EDUCATION

B.Tech in Computer Science | UKF College of Engineering & Technology | 2022-2026 | CGPA: 8.57/10

Class 12th (CBSE) | Sree Narayana Central School | 2022 | 90%

Class 10th (CBSE) | Sree Narayana Central School | 2020 | 83%

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript
 - Frontend Technologies: HTML, CSS, Bootstrap, React.js
 - Backend Technologies: Django, Flask
 - Database: MySQL
 - Tools: Git, GitHub, VS Code
 - Computer Science Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)
 - AI / Machine Learning: NumPy, Pandas, Matplotlib, OpenCV, Scikit-learn, TensorFlow, Machine Learning
 - Soft Skills: Creativity, Adaptability, Teamwork, Problem Solving Skills
-

WORK EXPERIENCE

- Full Stack Python Developer Intern | White Track Technologies Pvt Ltd | May 20 2025
 - Pursuing industry-oriented training in Python Full Stack Development with Artificial Intelligence.
 - Gaining practical knowledge of frontend, backend, database, and AI fundamentals through projects.
 - AI, Python & Data Science (Value-Added Program) | TechbyHeart | Jun 15-Jun 17 2025
 - Attended a 20-hour introductory program on Python, Artificial Intelligence, and Data Science
 - Learned basics of Python programming, datasets, and structured problem-solving
 - Gained beginner-level exposure to concepts like AI applications, data handling, and model workflows
 - DataScience & MachineLearning (Intern) | CyborgAI Gen Automation | Online | 28 May-3 June 2025
 - Attended an introductory internship program on Data Science and Machine Learning
 - Learned fundamentals of data preprocessing, exploratory data analysis (EDA), and visualization using Python libraries (Pandas, NumPy, Matplotlib)
 - Gained exposure to basic ML algorithms such as regression, classification, and clustering
 - Python (Intern) | Logiprompt Tech Solutions Pvt Ltd | July 12-July 16 2024
 - Completed a short-term internship focused on Python fundamentals
 - Improved understanding of Python syntax, functions, and modular programming
 - Practiced writing basic scripts and solving programming tasks using Python
-

PROJECTS

- Email Spam Detection System
 - Developed a machine learning-based email spam detection system using the Naïve Bayes classification algorithm.
 - Built a Flask backend to handle model inference and API requests.
 - Deployed and tested the application using GitHub and Render, validating predictions through prompt-based testing.
 - Technologies used: Python, Naïve Bayes, Flask, Scikit-learn, GitHub, Render
- AI Chatbot Application
 - Designed and implemented an AI-powered chatbot using the Phi language model for natural language understanding and response generation.
 - Integrated a Flask backend and a React-based interface to handle user queries and deliver seamless end-to-end chatbot interactions.

- Technologies used: Python, Phi Model, Flask, React.js, JavaScript
 - EV Connect – Electric Vehicle Charging Slot Booking Website
 - Developed a full-stack web application that allows users to reserve EV charging slots at different stations
 - Enabled email notifications to users upon successful booking confirmation
 - Technologies used: React.js, Firebase, EmailJS
 - Real-Time Object Detection System Using YOLO
 - Built a basic object detection model capable of identifying objects through face camera input and uploaded images
 - Implemented real-time inference for live detection and processed still images for classification and bounding box predictions
 - Technologies used: YOLOv8, Python, OpenCV
-
